PROJECTS / OPEN-SOURCE

Full Stack Netflix Clone | Link

TypeScript, JavaScript, CSS, Next.js, TailwindCss

- Created a Full Stack Netflix Clone Using React.js,Next.js,TailwindCss, MongoDB for storage purpose and NextAuth to Create Powerful and Scalabel web application
- This project contain Google and Github OAuth, user friendly Auth Screen UI and every time you load the screen random movie will be displayed on the Billboard of home screen.

Live Weather App | Link

JavaScript, CSS, HTML, OpenWeather Api

- With this project I was aiming to solve problem of watching television for weather report.
- With this weather app you can get the live weather data of the city of your choice.
- You can get the weather data of any city around the world, with feature like humidity and wind speed.

2048 Game | Link

JavaScript, CSS, HTML

- The goal of the puzzle game 2048: Puzzle Fusion is to have players combine tiles to find the elusive 2048 tile.
- To create this game we need some basic knowledge of 2D-Arrays and Backtracking

Open Source Contribution to Booster Cloud | Link

- Issue- Step by step link is broke #1391. I had started to contribute on this issue from May 24 , 2023.
- I had resolved this issue by May 26, 2023. Basically the issue is that folder was removed accidentally while migrating to the docusaurus. I have found folder from the other branch of the project and merge it with the main branch of booster repository.

CERTIFICATIONS

- AWS Academy Cloud Foundations - **Amazon Web Services**
- The Complete 2023 Web Developement Bootcamp - **Udemy**

HONORS & AWARDS

- I got the Pull shark badge on github for opening the pull request that have been merged successfully
