Personal Projects

LIVE WEATHER APP - LINK

* I undertook the development of a live weather application using a modern tech stack consisting of React.JS and also used an OpenWeatherAPI.
* By using this app you can get the Real-time Weather Data with the Responsive User Interface and amazing Data Visualization.

REAL TIME CHAT APP - LINK

* I conceptualized, designed, and developed a real-time chat application utilizing cutting-edge technologies, including React.JS in the front-end, Node.JS and Express.JS in back-end.
* With the help of this app user can chat to another user in the real time.

PERSONAL PORTFOLIO WEBSITE - LINK

- As a dedicated web developer, I designed and developed my personal portfolio website using HTML, CSS, and JavaScript. This project serves as a showcase of my skills and expertise in front-end web development and reflects my commitment to creating visually appealing and user-friendly online experiences.

HOME PAGE CLONE OF TWO-GOOD-CO. - LINK

- The project is the clone of original website of Two-Good-Co.
- This project is created using HTML, CSS, JAVASCRIPT and GSAP (GreenSock Animation Platform) for smooth animation.

Technical Skills

Languages: Python, JavaScript, HTML, CSS, C-Sharp, C++, C, Sass (Syntactically Awesome Style Sheets)
Developer Tools: Git, Github, Visual Studio Code, Postman
Technologies/Frameworks: Express.JS, BootStrap, React.JS, Node.js, Working Knowledge of API's
